NEWS RELEASE

FOR IMMEDIATE RELEASE

April 5th, 2006

Koolhaus Games Inc. is pleased to announce that we are collaborating with Simon Fraser University Associate Professor Dr. Greg Mori in the development of potentially ground breaking new research called “Semi-Automatic Video Motion Capture”.

Dr. Mori and Koolhaus Games have received partial funding from the National Sciences and Engineering Research Council of Canada – Cooperative Research and Development branch (NSERC – CRD) towards this exciting research.

“We are pleased to sponsor this exciting project and to be working with Dr. Mori and his talented team” stated Wolfgang Hamann, President/CEO of Koolhaus Games.

“Being involved with exciting research such as this will provide Koolhaus Games with a competitive advantage and will enhance the games we make. Great games depend on great technology to bring the vision of the designers, artists and programmers to life and to this end we are pleased to be a part of this exciting new research.”

Two year funding was provided for this project and has also received the support of Simon Fraser University and MITACS.
